

IWP : LAB 5**Q1.**

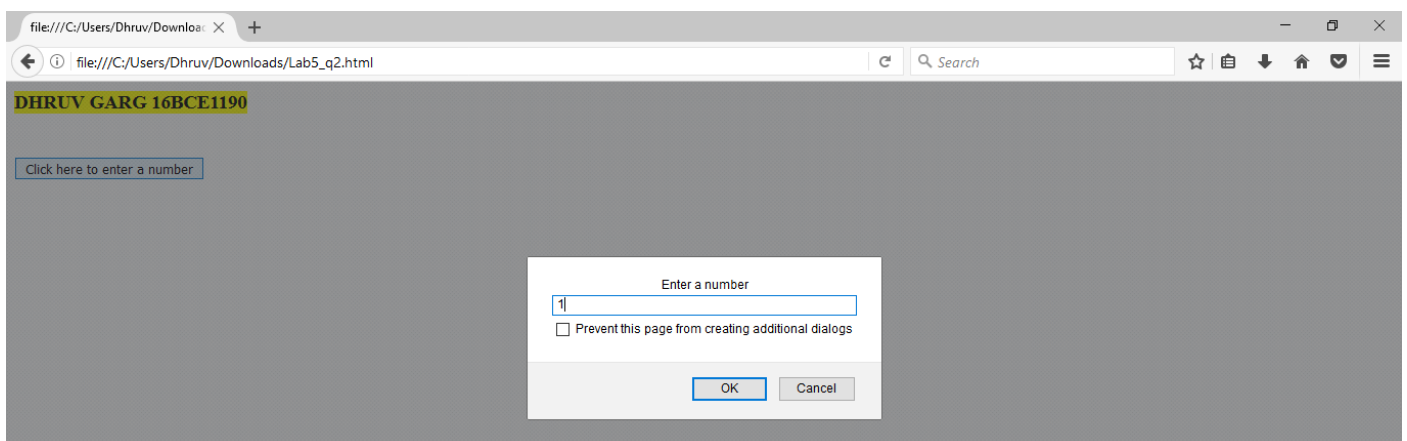

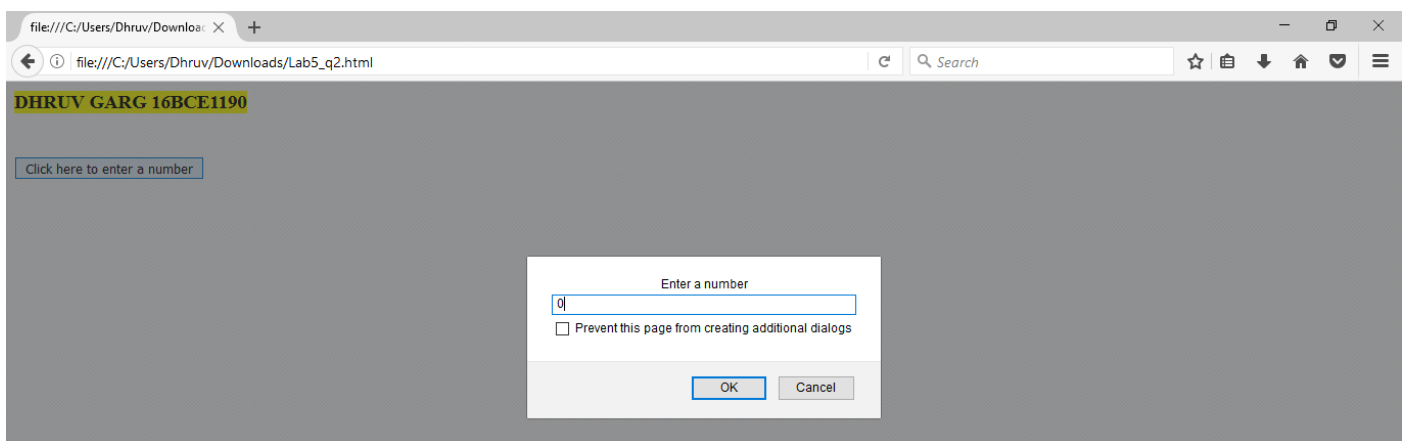

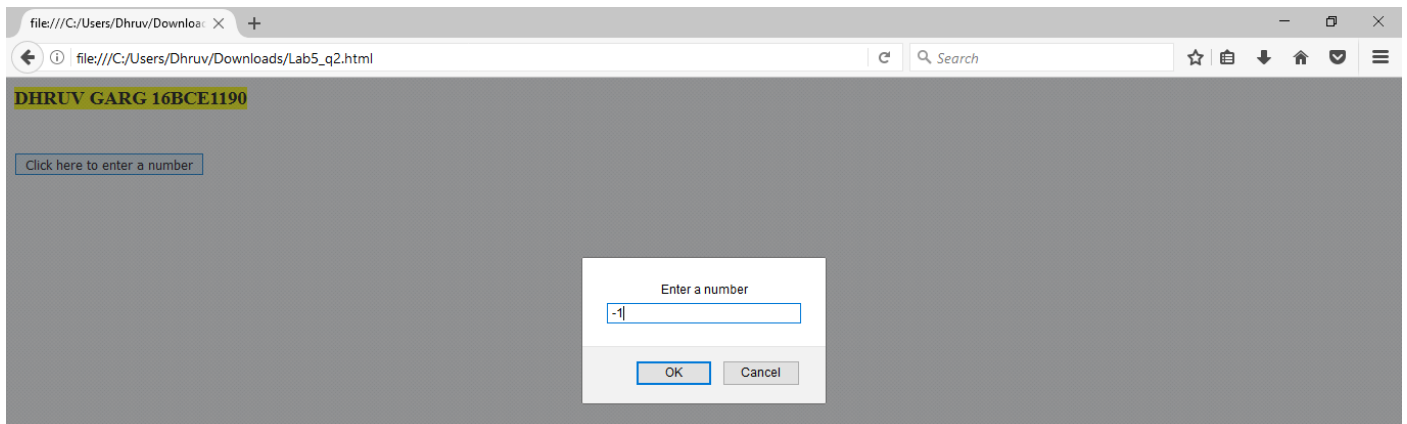

Use a one dimensional array and write a script to solve following problem. Read in 20 numbers, each of which is between 1 and 100. As each number is read, print it only if it is not a duplicate of a number that has already been read.

Q2.

Write a Javascript that reads ten numbers and displays the count of negative numbers, the count of positive numbers and the count of zero from the list.

Numbers in the array : -1, 0, 1, 2, -8, 0, 5, 6, -4, 0
